

Predictive Economic Trend Analysis - Project Dataset

Sheet 1: India Economic Data (2005-2010)

Year	GDP Growth (%)	Inflation (%)	Unemployment (%)	Exports (Billion USD)	Imports (Billion USD)
2005	9.3	4.2	5.6	103	149
2006	9.6	6.1	5.4	126	185
2007	9.3	6.4	5.2	163	251
2008	6.7	8.3	5.8	185	303
2009	8.5	10.9	6.2	178	288
2010	10.3	11.9	5.7	220	350

Sheet 2: Ideas for India Development

ID	Development Area	Proposed Idea	Expected Benefit
1	Education	AI-powered digital classrooms	Better learning outcomes
2	Agriculture	Smart irrigation systems	Increased crop yield
3	Healthcare	Rural telemedicine centers	Improved healthcare access
4	Transportation	Smart traffic management	Reduced congestion
5	Energy	Solar-powered villages	Sustainable energy
6	Employment	Skill development programs	More job opportunities
7	Environment	Large-scale tree plantation	Reduced pollution
8	Technology	AI innovation hubs	Startup growth
9	Tourism	Digital tourism promotion	Increased revenue
10	Manufacturing	Make in India expansion	Economic growth

Sheet 3: My Thoughts / Recommendations

Year	Observation	Recommendation
2005	Strong GDP growth	Continue infrastructure investment
2006	Stable economic expansion	Increase exports
2007	High economic performance	Focus on technology sector
2008	GDP slowdown due to global crisis	Strengthen domestic industries
2009	Recovery phase	Support MSMEs and startups
2010	Strong rebound	Invest in AI and digital transformation
